

For Better Tattooing

Scorpion  ^{X2}

Developed by:
Ink Machines 
For better tattooing

Scorpion

We are proud to present the Scorpion X2 tattoo machine. Upgraded to the core with a newly developed Swiss motor for outstanding performance and durability. Pushing the already proven design to further heights with LED illumination that indicates the status of the machine and more powerful drive magnets for even faster saturation. All critical components and several materials have been revised for better performance and reliability without compromise. Can be converted for Neo or regular cartridges and several grip options are available including disposables and one piece grips for regular cartridges.

Neo cartridges are leak proof and not relying on a membrane, with the magnetic drive system they are easy on the skin and therefore promotes a good healing process. Designed for the best possible hygiene and precision.

Specifications

Input voltage	0 - 12 volt DC (max. 12 volt DC)
Power connections	RCA or clipcord (max. clipcord end diam Ø1,6 mm)
Rpm range	0 - 8 000 rpm / min
Stitches / sec	0 - 130 / sec
Stroke length	3,7 mm
